

CONSAFEX™
 CONSAFE®
 STANDARD
 EASYLID

CONSAFE

The Consafe pail combines many advantages. A simple design with four lid options depending on requirements. Optimum utilisation of the pallets ensures optimised transport. Responsible for this is its conical shape, which allows stacking inside each other (=CON). The pail does not require a clamping or locking ring and has UN approval (=safe). Available are 3 diameters for 12 filling volumes.

1 DESIGN - FOUR DIFFERENT LID OPTIONS

1	CONSAFEX™ + high UN approval 	2	CONSAFE® + UN-approval, optionally with plastic closure 
3	STANDARD + cost-efficient 	4	EASYLID + easy to open and close
