

# BOTTLES

Bottles with plastic closures have become the standard packaging for liquid contents with low viscosity. For the piercing-diameters 32 mm and 42 mm piercings for optimal draining are available. In case of water-based contents, protection against corrosion is provided by varnishing and/or PET-coating on the inside. Plastic closures are also available on demand. We produce sizes from 0,125 l to 1,5 l.

## SIZES AND VERSIONS

	Volume in l	Ø in mm	Height in mm	Piercing size in mm	Approval	Quantity per EURO-Pallet	
						max. 1,2 m	approx. 2 m
