

CANISTERS

Canisters are the perfect packaging for the transport of liquid contents. They are ideal for transport and warehousing as the available space can be used most efficiently. From the volume size of 2,5 litres, our canisters are available with plastic handles for easy use. For the piercing-diameters 32 mm, 42 mm, and 57 mm, piercings for optimal draining are also available. All canisters can be supplied with tactile warnings on the body. In case of water-based contents, protection against corrosion is provided by varnishing and/or PET-coating on the inside. Plastic closures are available on demand.

DELIVERABLE SIZES AND VERSIONS

| OBLONGE | Volume (l) | Ø (mm) | Height (mm) | Piercing (mm) | Approval | Quantity (per EURO-Pallet) | |
|---------|------------|---------|-------------|---------------|----------|----------------------------|-------------|
