

CANS, PAILS, CYLINDRICAL

The advantage of cylindrical cans and pails is the possibility to empty them completely without leaving any residue inside. The lids are available with a rolled rim or with compound sealing. The lids can be secured either by security-clamps or a clamping-ring. In case of water-based contents, protection against corrosion is provided by varnishing and/or PET-coating on the inside (except 0,25 l). Cans and pails are available in sizes ranging from 0,25 l to 5 l.

SIZES AND VERSIONS

	Volume in l	ø (mm)	Height (mm)	Security-Clamps	Clamping-Ring	Quantity per EURO-Pallet	
						max. 1,2 m	approx. 2 m
CANS, PAILS CYLINDRICAL	0,25	73	77	without compound sealing		2.160	3.600
	0,75	99	119	X	X	792	1.485
	1,0	108	132	without compound sealing		560	1.040
	3,0	160 / 154	180	X	X	-	350
	1,2	160 / 154	76	X	X	-	455
	3,5	223 / 217	120	X	X	-	195

Other sizes possible on request.
